Professional ULV spraying technology  
Optimal distribution of active substance  
Versatile use

*ULV spraying systems for excellent results*

Mantis ULV spraying systems (Ultra Low Volume) allow you to achieve excellent results using only a minimal quantity of liquid product and this in a wide range of application areas, such as:

- ▶ **Disinfection** e.g. in restaurants, swimming pools and hospitals
- ▶ **Improvement and cooling of ambient air** in stables and other buildings
- ▶ **Insect control** in stables, greenhouses, warehouses and other buildings
- ▶ **Control of fungal infections** e.g. in case of infestations in greenhouses

## Benefit from our innovative ULV spraying technology

Our ULV spraying systems produce small, even droplets of a chosen liquid preparation and distribute these droplets uniformly across a surface or in the air. We offer specially adapted sprayers and systems for a wide range of applications:

### MANTIS ULV® spraying systems

#### Ideal for stationary installations

Our stationary spraying systems consist of specialized ULV rotary nozzles, matching pump units, either a separate control unit or connectivity to other control systems and a tank. The nozzles are installed over the items to be sprayed, all other components can be placed elsewhere in the set-up, depending on the particular situation.

### BEMA® hand-held sprayers

#### Ideal for spraying liquids on surfaces

An easy-to-use sprayer for a variety of applications, there are BEMA® models with a short or long shaft, with or without pump and with a 1-liter or 10-liter tank. The ULV rotary nozzle can be rotated so that horizontal, as well as sloping and vertical surfaces can be easily sprayed.

### ROFA hand-held sprayers

#### Optimal for spraying liquids in the air

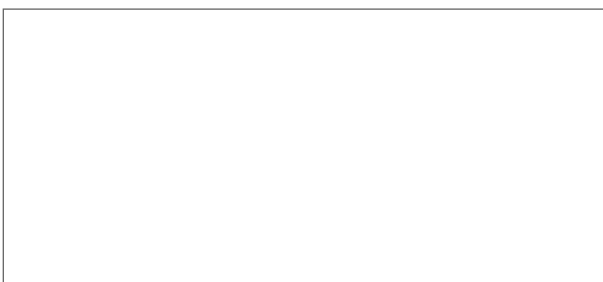

With the integrated fan of the ROFA sprayer, the tiny droplets can be distributed up to 7 metres throughout the room. The droplets will descend extremely slowly, thus ensuring a maximum effect of the sprayed substance.

## MANTIS ULV® Professional spraying systems

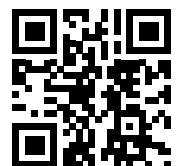

With over 40 years' experience in the development, production and sales of professional spraying systems for a variety of application areas such as industrial applications, crop protection and weed control, Mantis offers high quality spraying systems for the most efficient and user-friendly application of liquid preparations.
